Attaching Audioshoes and Receivers to Hearing Aids

The receivers allow the microphone to “talk” to the hearing aids.

STEP 1: Attach Receiver to Audioshoe
- Match up the three prongs on the receiver to the three holes in the bottom of the audioshoe.
- Push until you hear a click.

In the morning, put the audioshoe/receiver on the hearing aid.
At the end of the school day, remove the audioshoe/receiver from the aid. Store receivers in a safe place.
